BiblioCloudRecords

- Demo (67 minutes): https://www.youtube.com/watch?v=TI2-8HE2OWk&feature=youtu.be
- Website: https://www.bibliocommons.com/allproducts (see Add-ons section)
- Description: The BiblioCloudRecords module enables BiblioCommons to sync metadata from eContent providers, allowing libraries to display their eContent holdings in the BiblioCore catalog without the need to create, manage, or maintain MARC records in the ILS for supported vendors. Using this product instead of loading local records for OverDrive content would save about 12-15 hours/month in IFLS staff time, but would also mean OverDrive content would not be discoverable in either Sierra or the Classic Catalog.
- Cost: $8,389 annually
