

MORE Bib. meeting February 15, 2024

Supplemental materials

7. Local notes/local practices when accompanying material varies

Should we develop guidelines when an item does not have all its parts as to when it must be moved to its own record vs. kept on the same record? When a library does circulate an item without all of the original parts, such as a booklet for a music CD, how should this be listed on the Bib. record? Can we use a generic 500 note: "Accompanying material may vary"? Or do we need to be more specific?

8. Local headings for foreign television programs

Should we add a local heading for foreign television programs modelled after our local foreign films headings?

Examples:

655 7 Foreign television programs|zFrance.|2local

655 7 French language television programs.|2local

655 0 Foreign television programs.

9. Establishing bibliographic record standards for Library of Things items that must be picked up at the owning library

The ops committee asked us to discuss this and possibly come up with a uniform practice. They felt that if items all had a similar look in the online catalog, it would be easier for patrons and staff to know what has to be picked up at the owning library. Their suggestions were:

Possible solutions are to have pick-up at the local library (name) placed in **:c** field of **245 1_** taking the place of the author or as the edition statement **250**.

10. Best practices for worldcat entities

Example:

700 1 | O'Brien, Tim. †d1954- †e performer. †1 <https://id.oclc.org/worldcat/entity/E39PBJjMwDPKGDFk8h76h4CJDg>

How to handle. Keep or strip out? If we're stripping this out, can this be set up to not import into Sierra?

Subject: [OCLC-CAT] Next phase: OCLC WorldCat Entities linked data URIs for Works will be added to WorldCat MARC records

In December 2023, OCLC announced the addition of WorldCat Entities URIs (Uniform Resource Identifiers) for Persons, Places, and Events to WorldCat records as \$1 links in 100, 600, 647, 651, and 700 MARC fields. As a next phase, OCLC will begin adding WorldCat Entities URIs for Works to 758 fields in WorldCat bibliographic records. These 758 fields (Resource Identifier fields) will have this structure:

758__\$i [relationship_in_languageof_040\$b]: \$a [placeholder_for_label_+material_type] \$1 [placeholder_for_WorldCat_entityID] \$4 <https://id.oclc.org/worldcat/ontology/hasWork>

Example for English language of cataloging:

758__\$i has work: \$a HBR's 10 must reads on managing people Vol. 2 (Sound) \$1 <https://id.oclc.org/worldcat/entity/E39PCGDbpB6QKpK4gc9MwdDFVd> \$4 <https://id.oclc.org/worldcat/ontology/hasWork>

Example for French language of cataloging:

\$i a pour œuvre: \$a Le mouvement chrétien-social dans le canton de Genève (Text) \$1 <https://id.oclc.org/worldcat/entity/E39PCYvWdGxTkMYkvJgfF78Phw> \$4 <https://id.oclc.org/worldcat/ontology/hasWork>

For other languages of cataloging, the \$i will be omitted as we work to collect translations that accurately convey the relationship.

Adding WorldCat Entities URIs for Works will happen in stages over the next several weeks, beginning on Saturday, January 27.

Enriching WorldCat MARC bibliographic records with WorldCat Entities URIs establishes a bridge between MARC data and linked data, providing a starting point for connecting data across local systems and workflows and for using linked data functionality in local discovery systems.

11. Use of Novels of manners.|2lcgft and Regency fiction.|2local

Should Novels of manners.|2lcgft replace Regency fiction.|2local?

12. Featuring #BookTok in the catalog

Should #BookTok be used as a local heading or expressed in another way in the catalog? I have been considering ways to code, feature, link, etc. the trending BookTok books. My concern is that it is constantly evolving so may be really hard to manage and keep up. However, would patrons possibly benefit from having that as an access point? I don't know. My inclination is that they browse by title, but could possibly be missing something as well. I wonder if anyone has any great ideas for these titles?

13. Consider 655 7 Tonies.|2local as a local genre
